# WTAI-1052 Provider base configuration for ARC data | 5

As a producer I want to have provider base configuration mapping between CL3 and ARC,
so I can map CableLabs fields to ARC fields base on provider.

Acceptance criteria

configuration in database
shared mapping configuration for all providers
PTS specific mapping
WON specific mapping

Examples

PTS

**WTAI-992** Mapping between CL3 and Arc

| WTAI-552 [SPIKE] Configuration-driven approach - Use JavaScript script engine in JVM to transform java fields with user specific logic | 2 |
|---|---|

As a producer I want to apply some fields and attributes transformation base on configuration to be able to created/modify fields that is required by brand.

Example:

Standard:Episode.SEODescription = [Episode.Description]}}
Standard:ShowVideo.UrlKey = "[VideoPlayList.UrlKey],""-cart-"",[ShowVideo.AlphaSegmentNo]"

Question:
Should we use VideoPlaylist.Title before or after transformation in ShowVideo.UrlKey?

Standard:ShowVideo.UrlKey = "[VideoPlayList.Title],"" S"",[ShowVideo.SegmentNo]"
Standard:VideoPlaylist.Title = "[Series.Title],"": """""",[Episode.ShortTitle],"""""""""""

# WTAI-440 Aspect Ratio for Images

As a producer I would like to put aspect ratio for ImageAssetRefs
in CL3 and map it to field in ARC, so we will have information about proportions in ARC.

Acceptance criteria

Mapping between CL3 and ARC
